

Environmental Checklist Instructions

Purpose of This Document:

All applicants must consider the potential environmental impacts of their projects as all projects will be subject to a NEPA (National Environmental Policy Act) and MEPA (Montana Environmental Policy Act) review. Consideration of these impacts on the location, design, or construction actions may help avoid expensive costs. A project may not be eligible for funding if it results in significant environmental degradation even with mitigation.

Per Section 102(2)(C) of the National Environmental Policy Act, any Federal action significantly affecting the quality of the human environment must complete a NEPA review and prepare either an EIS (Environmental Impact Statement) and a ROD (Record of Decision); EA (Environmental Assessment) and a FONSI (Finding of No Significant Impact); or document a Categorical Exclusion (CE). Major Federal actions may include: any projects within Federal jurisdiction and/or triggering Federal permits; Federal funding in whole or part; projects on Federal land or affecting Federal facilities; Continuing Federal actions with effects on land or facilities; and new or revised Federal rules, regulations, plans, or procedures.

Montana state agencies are required to comply with the Montana Environmental Policy Act (MEPA) per state law and associated agency-specific Administrative Rules (ARM 36.2.523). MEPA requires state agencies to prepare a detailed statement on any project, program, or activity directly undertaken by the agency; a project or activity supported through a contract, grant, subsidy, loan, or other form of funding assistance from the agency; and a project or activity involving the issuance of a lease, permit, license, certificate, or other entitlement for use or permission by the agency (MCA Title 75, Chapter 1).

Instructions:

Complete the Environmental Checklist on the following pages after the instructions below.

Example			
Impact Code	Impact Type	Permits/ Mitigation Required?	Explanation of Impact to Resource
1. Soil Suitability, Topographic and/or Geologic Constraints (example: soil slump, steep slopes, subsidence, seismic activity)			
<input type="checkbox"/> No Impact <input type="checkbox"/> Beneficial <input type="checkbox"/> Adverse	<input type="checkbox"/> Direct <input type="checkbox"/> Indirect <input type="checkbox"/> Cumulative	<input type="checkbox"/> Permit <input type="checkbox"/> Mitigation <input type="checkbox"/> NA	<i>Current Conditions:</i> <i>Preferred Alternative Environmental Narrative:</i>

- 1. Impact Code:** In the first column, identify the impact that the preferred alternative will have on each resource (e.g. 1. Soil Suitability, Topographic and/or Geologic Constraints) in the project area. Select from the following impact codes:

- No Impact: No impact to the resource is anticipated or this is not applicable to this project.
- Beneficial: Potentially beneficial impact to the resource.
- Adverse: Potentially adverse impact to the resource.

Please note that a resource may have more than one impact. Identify all possible impacts to the resource in the space provided. For example, the preferred alternative may have a short-term direct negative impact and a long-term direct and indirect positive impact on the resource.

Check all boxes that apply and use the space provided in the final column "Explanation of Impact to Resource" to explain.

Example			
Impact Code	Impact Type	Permits/ Mitigation Required?	Explanation of Impact to Resource
1. Soil Suitability, Topographic and/or Geologic Constraints (example: soil slump, steep slopes, subsidence, seismic activity)			
<input type="checkbox"/> No Impact <input type="checkbox"/> Beneficial <input type="checkbox"/> Adverse	<input type="checkbox"/> Direct <input type="checkbox"/> Indirect <input type="checkbox"/> Cumulative	<input type="checkbox"/> Permit <input type="checkbox"/> Mitigation <input type="checkbox"/> NA	<i>Current Conditions:</i> <i>Preferred Alternative Environmental Narrative:</i>

2. Impact Type: In the second column, identify the type(s) of impact to the resource from the preferred alternative. (Impacts may be direct, indirect or cumulative).

- Direct impacts: Occur at the same time and place as the proposed project.
- Indirect or secondary impacts: Occur at a different location or later time than the proposed project.
- Cumulative impacts: Collective impacts on the environment when considered in conjunction with other past, present, and future actions related to the proposed project. Cumulative impact analysis includes a review of all state and nonstate activities that have occurred, are occurring, or may occur that have impacted or may impact the same resource as the proposed project.

Just as above, please note that a resource may have more than one impact. Identify all possible impacts to the resource in the space provided. For example, the preferred alternative may have a short-term direct negative impact and a long-term direct and indirect positive impact on the resource. Check all boxes that apply and use the space provided in the final column "Explanation of Impact to Resource" to explain.

3. Permits/Mitigation Required: In the third column, please select if a permit and/or mitigation is required for the project (e.g., 310, USACE Section 404 Nationwide).

- a. Please make sure to include which permits (if any) are required for the particular resource and what mitigation techniques will be used if impacts are to occur.

4. Explanation of Impact to Resource: In the final column, use the space provided on the Environmental Checklist to summarize the following information:

a. Current Conditions

- Describe the current environmental resources of the affected area including the impact of no action. Your description of the current natural resources will provide a baseline to compare all alternatives and their associated environmental impacts.

b. Preferred Alternative Environmental Narrative:

- Describe the impact of the preferred alternative or ***indicate why there is no impact*** from the project.
- Identify any reasonable cumulative impacts that may result from implementing the preferred alternative. Cumulative impacts are the collective impacts on the environment when considered in conjunction with other past, present, and future actions related to the proposed project.
- If a potentially adverse impact is identified for the preferred alternative, the applicant must provide the following:
 - An analysis of the severity, duration, extent, and frequency of the impact. Please specify and describe the following:
 - Severity: negligible, minor, or major.
 - Duration: short-term or long-term.
 - Extent: local, regional, or statewide.
 - Frequency: non-recurring or recurring.
 - An explanation of short- and/or long-term measures to mitigate the impact with a discussion on the effects of those mitigative measures on the proposed project.
- Identify any required permits.

5. Additional Information: Underneath the table the following information must be provided:

- a. Sources of Information: Identify all sources consulted for the completion of the Environmental Checklist. Sources may include studies, plans, documents, or the persons, organizations, or agencies contacted for assistance.
